SUMMARY

Detail-oriented Full Stack Web Developer with strong expertise in React.js, Node.js, and Django REST Framework. Experienced in building scalable e-commerce platforms, POS and inventory systems, admin dashboards, and enterprise digital platforms with secure JWT authentication and optimized PostgreSQL database structures. Passionate about writing clean, maintainable code and building high-performance full-stack web applications.

TECHNICAL SKILLS

Frontend

React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Responsive Design

Backend

Python, Django, Django REST Framework (DRF), Node.js, Express.js, JWT Authentication, MySQL, PostgreSQL

Tools & Platforms

Git & GitHub, Postman, VS Code, REST APIs, Render, Vercel, Deployment Basics

Final Year Project

AI-Based Campus Energy Prediction and Optimization System (AWKUM)

Technologies: Python, Pandas, NumPy, Scikit-Learn, XGBoost, Matplotlib, Streamlit, Joblib

Developed an AI-powered campus energy management system using XGBoost to forecast hourly energy consumption based on temperature, time, occupancy, and seasonal patterns. Performed data preprocessing and feature engineering on historical multi-floor datasets, implemented energy optimization and solar integration to reduce peak grid load by up to 30%, and built a Streamlit dashboard for energy forecasts, optimization results, and scenario analysis. Serialized the trained model using Joblib for efficient reuse without retraining.

WEB PROJECTS

Multi-Category POS & Inventory Management System

Live Demo: <https://multi-category-pos-inventory-manage.vercel.app/login> | **GitHub:** <https://github.com/MuneebAmin55/multi-category-pos-inventory-management-system>

Technologies: React.js, Redux Toolkit, Node.js, Express.js, Sequelize, PostgreSQL, JWT, Render, Vercel

Developed and deployed a full-stack POS and inventory management system for multi-category businesses, featuring role-based access for Admins, Managers, and Cashiers. Implemented product and inventory management, low-stock monitoring, POS checkout, transaction tracking, sales statistics, authentication, and protected role-based routes. Built a RESTful backend with Node.js/Express and PostgreSQL and deployed the backend on Render and frontend on Vercel.

Full-Stack E-Commerce Platform

Live Demo: <https://fullstack-ecommerce-seven-lovat.vercel.app/> | **GitHub:** <https://github.com/MuneebAmin55/fullstack-ecommerce>

Technologies: React.js, Redux Toolkit, Django, Django REST Framework, PostgreSQL, JWT

Developed a full-stack e-commerce platform with a responsive React.js frontend and Django REST Framework backend. Implemented JWT-based authentication, product browsing, product details, shopping cart management, order processing, and RESTful APIs. Used Redux Toolkit for centralized frontend state management and PostgreSQL for persistent data storage, with separate frontend and backend deployment architecture.

PawPal – Pet Health Care Tracker

Live Demo: <https://pets-one-beta.vercel.app/> | **GitHub:** <https://github.com/MuneebAmin55/Pets>

Technologies: React.js, Node.js, Express.js, PostgreSQL, JWT, Google OAuth, Nodemailer

Built a full-stack pet health management platform that enables users to manage pet profiles and maintain organized health records. Implemented secure JWT authentication, Google sign-in, OTP-based password recovery, CRUD operations, and PostgreSQL database integration. Designed the system to support vaccination records, medical history, medications, visits, weight tracking, and downloadable health reports.

AL-HADAB Enterprise Digital Platform

GitHub: <https://github.com/MuneebAmin55/al-hadab-enterprise-platform>

Technologies: React.js, Redux Toolkit, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, Cloudinary

Developed a modern enterprise digital platform for AL-HADAB Trading & Contracting Co., designed to strengthen the company's online presence and showcase its projects, services, capabilities, certifications, clients, workforce, news, and career opportunities. Built a dynamic admin/CMS system with CRUD management, role-based access, media management, inquiries, and workforce statistics. Implemented bilingual English/Arabic support with RTL/LTR layouts, responsive design, SEO considerations, secure authentication, and scalable full-stack architecture.

Education

2022 – 2026 Bachelor in Computer Science Abdul Wali Khan University Mardan

CGPA – 3.35

2020 – 2022 FSc (Intermediate) Unicom College Rustam Mardan

Percentage: 81%

2018 – 2020 Matriculation Unicom College Rustam Mardan

Percentage: 85%

EXPERIENCE

Remote Software Development Intern – Teerop

Completed a remote internship at Teerop, working on assigned development tasks and building an Inventory Management System. Contributed to designing and implementing core inventory features, gaining hands-on experience with full-stack development in a remote, task-driven work environment.

LANGUAGES

English – Fluent, Urdu – Proficient
